

foldEvery [3,5] [slow 2] \$ density 16
\$ "grey black"

The image displays a series of horizontal bars of varying widths and shades of grey and black, representing a visual output of a function. The bars are arranged in a sequence, with the top bar being the widest and the bottom bar being the narrowest. The colors transition from a light grey at the top to a dark grey, and finally to black at the bottom. The bars are separated by thin white gaps. The overall effect is a vertical stack of horizontal bars that change in width and color from top to bottom.
